

Labelling software

Labelling software

With Sharpmark software you can print a wide range of cable and equipment labels using an office laser printer.

It is convenient and cost effective as there is no need for custom printers to produce professional-looking labels that are durable and easy to read.

Combined with high quality printable labels from Sharpmark, the software allows you to organise and label installations clearly, minimising downtime for regular maintenance or trouble-shooting.

Benefits of Sharpmark software

- Intuitive to use and requires no training
- Pre-loaded with all the Sharpmark label part numbers and standard templates to fit components from many manufacturers. You just select the one you need.

- You can also create your own job from scratch
- It creates complex or simple numbering schemes with ease - you just enter the start point and end point of the sequence and the software completes the rest
- You can use number sequences, alpha sequences, fixed text or a combination of all three
- There are many layout options for each label
- You can import data from spread sheets and word processors as well as graphics
- Runs under all recent versions of Windows
- You can import and export your labels for easy transfer between PCs
- Comes with a multi-user licence and free upgrades
- Unlimited technical support is available by telephone or email.

About Sharpmark Solutions

We are leaders in specialist labelling and identification systems and have been supplying the telecoms, electrical and construction industries for 13 years. We manufacture all of our products in the UK and offer a 1-2 day delivery service with same day delivery available for urgent orders.
